
HOW TO MANUALLY UPDATE

1

Download the latest firmware for XYFI

www.option.com/updatexyfi

(it is currently only possible to update manually using Windows or Mac OS)

2

Connect to XYFI using USB Connector or WiFi

3

Open your web-browser and go to the XYFI Admin pages (log in)

**4**

Within the Admin pages, click "Settings"

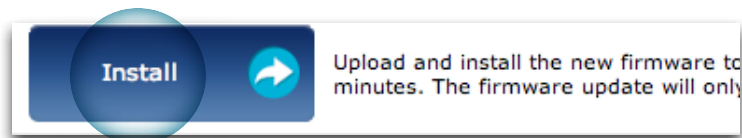

5

Click “About XYFI” bottom left, then “Firmware Update”

6

Click “Browse” to select the new firmware file you have downloaded and then press the “Install” button

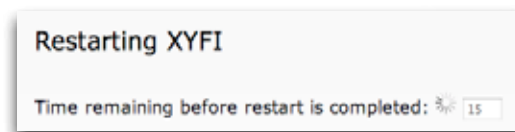

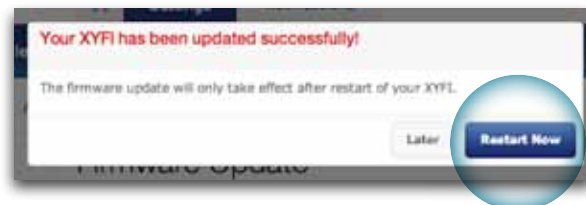

7

Wait until the progress bar reaches 100% (approx. 2 minutes)

8

Confirmation of successful update, click “Restart now”

After update is finished the new firmware will only take effect after a restart of XYFI.

9

Your XYFI has been updated. **ENJOY IT!**
