- On 5 June 2008 Option announced the GlobeTrotter Connect for Linux, the connection management software for Mobile Internet Devices (MIDs) based on the Intel® Centrino® Atom[™] processor technology.
- A major contract with a MID device manufacturer is on schedule for a Q3 announcement, confirming the value of the investment Option continues to make in this market.
- Revenue generating headcount has been broadened with a new VP North America and strengthened staff, enhanced capabilities in Australia and the South Pacific, and a new VP Distribution which will give access to numerous new and emerging markets without the need for dedicated staff.
- In June 2008 the board of directors resolved to convene an extraordinary general meeting of shareholders for 29 July 2008 (and 26 August 2008, should the statutory attendance quorum for amendments to the bylaws not be reached at the above meeting) in order to deliberate on amongst others (1) the full replacement of the warrant plan "U" by a new warrant plan "V" with a possible issuance of maximum 2,500,000 warrants in favour of the directors, the employees and self-employed persons, (2) several amendments to the Company's bylaws including the modification of the date of the annual meeting shareholders, and (3) the remuneration and the replacement/nomination of directors.

 directors will be subject to vote at the Extraordinary General Meeting of Shareholders on July 29, 2008.
 If elected, both will act as independent Board members, expanding the Option Board of Directors to
 eight members.

Comments on the results

Commenting on the results, Jan Callewaert, CEO of Option, said: "The wireless broadband device market continues to evolve at break-neck speed.

USB modems accounted for more than three quarters of our shipments in the second quarter – a milestone we hadn't expected to reach until the end of the year. The success of our iCON 225 USB modem was the foundation for the highest quarterly shipments ever achieved by Option.

We have also seen demand for embedded modules grow by more than 30% as laptop manufacturers add wireless broadband capability to an ever broader proportion of the products.

Operators have taken full advantage of a highly competitive supplier community and margins have been squeezed across the sector. Prices of wireless broadband devices have seen quarter-on-quarter price reductions that are typical of the year-on-year reductions witnessed in other consumer electronic product categories. We expect a more even balance between operators and suppliers going forward.

Against this background, we continue to scrutinise our own cost base, supply chain and operations with a relentless intensity to achieve the efficiency required to succeed in a high volume mass market. While this is still a work in progress, Q2 operating expenses were 11% lower than Q4 2007.

Challenges remain, but we retain our confidence in the wireless broadband opportunity. As a source of secondary subscriptions and new revenue streams, it remains the top priority for mobile operators worldwide. Embedded wireless broadband is becoming an essential feature for laptop manufactures while consumer electronic OEMs are employing embedded modules in a whole new category of mass market

mobile internet devices (MID). Option made an early commitment to embedded modules for these devices and will begin to reap the rewards of that investment during the fourth quarter.

In the meantime, the fine-tuning of our organisation will continue and new distribution options are being explored to extend routes to market and drive up volume and revenue.

We also look forward to further broadening the insight and experience of our company with the proposal to elect two new independent board members at the forthcoming shareholder meeting".
