For our Product Validation team we are looking for a

PRODUCT QUALITY ENGINEER

The Product Validation team is responsible for the optimization and automation of all test processes within the engineering department. All products (hardware, firmware, software …) are validated against specified test plans. As more and more products are commercialized and quality is central to this, we are looking for a motivated employee to join our team of Product Quality Engineers.

The product quality engineer is part of a multi-disciplinary team covering complete product testing.

The daily tasks of the Product Quality Engineer are:

- Manual and automatic testing of software/firmware
- Screening and analyzing of the test results
- Development of scripts: adjustment and implementation of test cases for automatic testing
- Writing release notes, procedures, manuals and reports
- Adjustment and improvement of test cases for software/firmware/system products
- Investigate new test strategies and methods
- Close collaboration with the engineering teams to expand test coverage and increase product quality
- Management of test setups

Profile:

- M.Sc. or B.Sc. Electronics or ICT with some relevant experience
- You have experience or interest in
  - Testing technical products of software and firmware
  - Quality principles of testing
- Experience with scripting languages for test automation is a plus
- Fluent oral and written Dutch and English
- Good communication skills oral and written
• Can work with deadlines
• Can work in fast changing environments
• Team player
• Quick learner
• Quality driven

**What we offer as a company and expect from you**

Right from the first day you join us, we will give you the opportunity to prove your talents in a challenging environment and in a job that suits your skills, experience and personal qualities. You’ll find yourself a member of a very focussed, open-minded and, foremost, results-driven team. As an Optionese, you will be encouraged and pushed to take responsibility for what you do, to show initiative, to think out-of-the-box and, above all, to act as a member of team that is working hard at delivering solutions to customers.
