**SURF ON THE INTERNET**

See "Step 2"

**MAKING PHONE CALLS**

Plug your telephone into the phone socket on GlobeSurfer® II and you are ready to make calls through the mobile network.

To change telephone settings from the GlobeSurfer® II management console:

> Click on 'System setup' and 'Telephone' and you can access the telephone settings and see the Missed, Incoming and Outgoing calls.

---

**EVERYDAY USE**

You can access and browse the Internet through GlobeSurfer® II and use your e-mail just as if your computer is always connected. If the GlobeSurfer® II does not connect automatically, then use the checklist below to connect your GlobeSurfer® II to the Internet.

**• Step 1**

Make sure that the power adapter is connected, the GlobeSurfer® II unit is on and the SIM card is inserted correctly.

**• Step 2**

Open an Internet browser on your computer and click the bookmarked link to GlobeSurfer® II, or type http://192.168.1.1 in the address bar.

Note: If this does not work make sure that your computer is connected to GlobeSurfer® II using either LAN or WLAN. If you are uncertain, check the 'Network Connections' in 'My Network Places' or in the Windows® Control Panel.

**• Step 3**

Enter the PIN code, if requested, and click 'OK'.

1. The 'Connection Status' window is displayed.
2. Click 'Connect', or press the connect button on the top of your GlobeSurfer® II, to connect to the Internet.

'UMTS connected' (or 'GPRS connected') is displayed on the GlobeSurfer® II display when the connection is established and 'Connected' is displayed in the Connection Status window. You are now connected to the Internet and you can open a new browser window and start surfing on the Internet.

Note: No need to login to make phone calls or surf on the Internet. If you want to change settings or to send or read SMS text messages then you have to login to GlobeSurfer® II.
WLAN connection in 'Step 8'.

Note: If you want to use a wireless (WLAN) connection to perform the GlobeSurfer® II using a LAN cable or a WLAN network.

- Step 1: Install SIM card
  Insert the SIM card into the slot on the right-hand side of the GlobeSurfer® II. Press carefully until it snaps into place.
  Note: The orientation notch must face downwards to the left with the gold plated contacts facing away from you.

- Step 2: Connect power
  Connect the power adapter:

  Plug the power adapter into the AC mains and plug the DC cable firmly into the 5V DC input of GlobeSurfer® II.
  The unit powers-up within about 30 seconds.

  CAUTION: Use the power adapter supplied with GlobeSurfer® II. Using a different power adapter can damage GlobeSurfer® II.

  Note: You need a SIM card from your mobile operator to use your GlobeSurfer® II.

- Step 3: Connect your computer
  Connect your computer:

  1. Start your web browser.
  2. Choose the language you want to use.
  3. Tip: Save the link (URL) to this page as a bookmark in your browser window and use your computer to "surf" the Internet with the GlobeSurfer® II Management Console in the future by using the bookmark.
  4. Select the language you want to use.
  5. Enter a password for this account in the 'New password' field and again in the 'Retype password' field.
  6. Click 'OK' to save the new password.
  7. The 'Quick Setup Wizard' opens.

  Note: You are now asked to key-in the PIN code next time you are asked to login.
  The 'Quick Setup Wizard' guides you through the main settings you have chosen.
  Note: Alternatively, you can press the 'Connect' button on the GlobeSurfer® II unit.

- Step 4: Log in to GlobeSurfer® II
  Log in to GlobeSurfer® II:

  1. Click 'Connect'.
  2. The status initially shows 'Connecting' and then 'Connected'.
  3. When you get to the 'Connect' page, read the summary of the settings you have chosen.
  4. Click 'Finish' to accept settings and confirm with 'OK'.

  Note: The 'Quick Setup Wizard' must be installed and activated on your computer.

- Step 5: Set up
  Set up GlobeSurfer® II with the 'Quick Setup Wizard'.
  The 'Quick Setup Wizard' guides you through the main settings for your GlobeSurfer® II and, most importantly, gets you connected straight away.

  1. Enable cookies or allow them for this address.
  2. Enter the PIN code and click 'OK'.
  3. Type the PIN code and click 'OK'.
  4. Select the device with the SSID that you entered in the 'Quick Setup Wizard', or the default SSID, and click 'Connect'. If encryption is set on your GlobeSurfer® II, a window is displayed that requests a 'Network key'. Type in the same pre-shared key that was entered in the 'Quick Setup Wizard'.
  5. Enter the pre-shared key in both fields and click 'Connect'. After a minute the message 'Connected' is displayed in the window and an icon is displayed in the Windows® XP notification area.
  6. In future, your computer will automatically connect to GlobeSurfer® II.

- Step 6: Entering the PIN code
  Enter the PIN code:
  The PIN code is specific to your SIM card.
  You are now asked to key-in the PIN code:

  1. Type http://192.168.1.1 in the browser address bar, and press 'Enter' or click 'Go'.
  2. When you get the 'PIN OK' response then click 'OK'.
  3. Enter the PIN code in the 'New password' field and again in the 'Retype password' field.
  4. Select the language you want to use.
  5. Enter a password for this account in the 'New password' field and again in the 'Retype password' field.
  6. Click 'OK' to save the new password.

  Note: The User name for the default account is 'admin', use this together with your password next time you are asked to login.

  1. Open a new browser window and go to a page on the Internet.
  2. Type http://192.168.1.1 in the browser address bar, and press 'Enter' or click 'Go'.
  3. Select the device with the SSID that you entered in the 'Quick Setup Wizard', or the default SSID, and click 'Connect'. If encryption is set on your GlobeSurfer® II, a window is displayed that requests a 'Network key'. Type in the same pre-shared key that was entered in the 'Quick Setup Wizard'.
  4. Enter the pre-shared key in both fields and click 'Connect'. After a minute the message 'Connected' is displayed in the window and an icon is displayed in the Windows® XP notification area.
  5. In future, your computer will automatically connect to GlobeSurfer® II.

- Step 7: Connecting
  Connect to the Internet:

  1. Click 'Connect'.
  2. The status initially shows 'Connecting' and then 'Connected'.
  3. Open a new browser window and go to a page on the Internet.

  Note: Alternatively, you can press the 'Connect' button on the GlobeSurfer® II unit.

- Step 8: Configuring your computers:
  Configuring your computers:

  Once GlobeSurfer® II is configured as above it is ready to be used.
  If you are only using the Ethernet LAN connection with the GlobeSurfer® II, no further configuration is needed. Simply open a browser window and use your computer to "surf" the Internet with the GlobeSurfer® II.

  If you want to use the wireless connection (WLAN), additional settings are required on each computer that is connected to GlobeSurfer® II via the WLAN.

  Note: You need a SIM card from your mobile operator to use your GlobeSurfer® II.

  Use the following instructions to connect your computer to the GlobeSurfer® II.

  1. Turn on your computer and enable the WLAN adapter, if necessary.
  2. From the Windows® 'Start' menu, select 'Control Panel'.
  3. Click 'Network Connections'.
  4. Click 'Wireless Network Connection' and then 'Show Wireless Networks'. A list of available wireless networks is displayed.
  5. Select the device with the SSID that you entered in the 'Quick Setup Wizard', or the default SSID, and click 'Connect'. If encryption is set on your GlobeSurfer® II, a window is displayed that requests a 'Network key'. Type in the same pre-shared key that was entered in the 'Quick Setup Wizard'.
  6. Enter the pre-shared key in both fields and click 'Connect'. After a minute the message 'Connected' is displayed in the window and an icon is displayed in the Windows® XP notification area.
  7. In future, your computer will automatically connect to GlobeSurfer® II.
