

OPTION

CloudGate Home Office

**Secure and simple to install
Smart Home Office Solution pack for
Small and Medium-sized Enterprises**

“The more homeworkers, the greater the vulnerability to hackers and cyber attacks. CloudGate Home Office is the secure way to easily connect your workforce from anywhere.”

SMART, FAST, SECURE

The Option™ CloudGate Home Office Solution allows companies to implement home office for their employees in a smart and secure way in the blink of an eye.

The solution uses a fully virtualized managed switch that connects employees over secure VPN technology to the internal company network, just as they would be connected in the office to the internal network via WiFi or cable inside the office.

EASY, NO NEED FOR ADDITIONAL SOFTWARE

The solution consists of 2 components: A CloudGate Gateway, that connects the internal network to a private virtual switch over VPN, and the built-in VPN client on each employee's computer, tablet or smartphone. No need to install additional software!

IDEAL FOR SMALL & MEDIUM-SIZED COMPANIES

The CloudGate Home Office Solution is ideal for small and medium-sized enterprises but can be used by anyone who is looking for a secured way to connect to sites to each other in a simple manner.

IN THE BOX

Standard Cloudgate Home Office Pack

- 1 x Option CloudGate Ethernet

- 1 x Power Supply

- 1 x Year Secure Remote Access for 5, 10 or 20 users*

*Home Office Pack available in 3 versions

OPTION

GET STARTED IN MINUTES

The CloudGate Gateway with power supply will need to be installed by the IT department of your company.

The IT administrator of your company registers the users via support@option.com.

Required are:

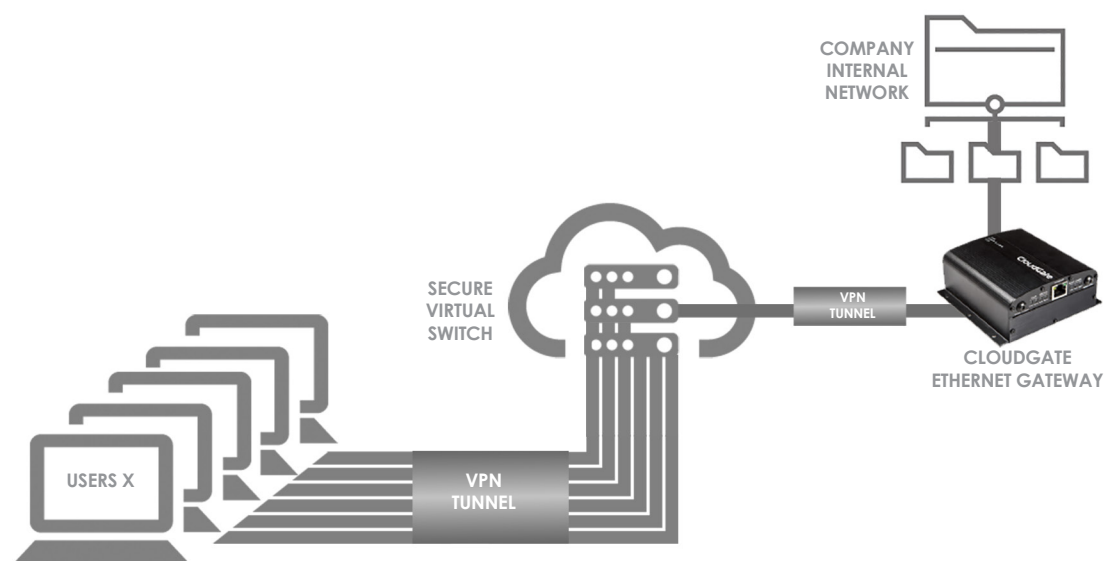

1. Company name
2. E-mail addresses of each employee that will use the system
3. Serial number of the CloudGate Gateway.

Each employee will then receive an invitation and instructions on how to connect to the virtual switch, via e-mail.

SECURE ACCESS FROM ANYWHERE

The CloudGate will connect over L2TP-IPsec to the virtual switch of your company automatically when powered on.

Once the VPN connection is established, you can access your companies' internal network from anywhere.
